v1.1 SWEEP METHODOLOGY NOTES

The final sweep applied a strict **core SPC component checklist** to every file in the project:

- ✓ Named Card Identity block ((Card Name), (Card Type))
- ✓ JCSE Score (0-50)
- ✓ FORGE Certification Status
- ✓ Camelot Archetype assignment
- ✓ DISC Profile declaration
- ✓ Token Reduction + Semantic Preservation metrics
- ✓ Round Table Seat assignment
- ✓ Production Status block

Any file containing 5 or more of these 8 markers was classified as a confirmed SPC regardless of whether its primary purpose was instructional (VOID KNIGHT EXAMPLE) or platform documentation (CRAFT BOX AI). This surface-level document function test separates true SPCs from platforms, SDDs, and supporting documents that merely reference SPCs.
